COURSE DESCRIPTION:
This is an applied intermediate microeconomics course that focuses on Economics of Production and its application in agricultural and business management. The Economics of Production is looked at from the inside as concerns of production, cost, profitability, and competitive strategy considerations, and it is examined from the outside as concerns of the influences of market demand, competition, market structure, and resource supply. The course uses examples and applications to bridge the gap between theory and practice. The course also gives a good grounding in the terminology of Operations Management and an overall perspective of Operations Management within the context of a business organization.

LEARNING GOALS:

In this class you will learn:

The operations management of how inputs are transformed into output to achieve business objective of profit maximization. You will be learning few tools of operations to find optimal combinations of inputs and output.

• Production (with single input and multiple inputs) under perfect competition and under imperfect markets.
• Operation strategies, forecasting
• Project management
• Supply-Chain and inventory management
• An introduction to risk and uncertainty

ACADEMIC INTEGRITY
The university's policy on Academic Integrity is available at http://academicintegrity.rutgers.edu/academic-integrity-policy. The principles of academic integrity require that a student:

- properly acknowledge and cite all use of the ideas, results, or words of others.
- properly acknowledge all contributors to a given piece of work.
- make sure that all work submitted as his or her own in a course or other academic activity is produced without the aid of impermissible materials or impermissible collaboration.
- obtain all data or results by ethical means and report them accurately without suppressing any results inconsistent with his or her interpretation or conclusions.
- treat all other students in an ethical manner, respecting their integrity and right to pursue their educational goals without interference. This requires that a student neither facilitate academic dishonesty by others nor obstruct their academic progress.
- uphold the canons of the ethical or professional code of the profession for which he or she is preparing.

Adherence to these principles is necessary in order to ensure that

- everyone is given proper credit for his or her ideas, words, results, and other scholarly accomplishments.
- all student work is fairly evaluated and no student has an inappropriate advantage over others.
- the academic and ethical development of all students is fostered.
- the reputation of the University for integrity in its teaching, research, and scholarship is maintained and enhanced.

Failure to uphold these principles of academic integrity threatens both the reputation of the University and the value of the degrees awarded to its students. Every member of the University community therefore bears a responsibility for ensuring that the highest standards of academic integrity are upheld.
