- **Agricultural Accounting: A Practitioner's Guide, 2<sup>nd</sup> Edition** by Steven M. Bragg, CPA  
ISBN-13: 978-1642210293

**COURSE DESCRIPTION:**

The course introduces general accounting concepts and offers instruction into how an accounting system is constructed and operated, with a specific focus on the basic financial infrastructure governing modern agricultural production. The course pays particular attention to using accounting methods to evaluate and manage agricultural business risks, financing alternatives, hedging strategies, cooperatives, government programs and financial statement preparation.

**LEARNING GOALS:**

1. To introduce, understand and recognize various accounting principles, such as the differences in financial and management accounting, accrual accounting, how various categories of assets and liabilities are classified in a balance sheet, and how financial results are captured in an income statement. The accounting and financial concepts will be viewed through the lens of the agricultural production industry.
2. To understand the various agricultural-specific accounting transactions with a strong focus on financing, investing, and operating activities, in addition to related legal, regulatory, and business organizational issues.
3. To understand the nature of derivatives and the use of hedges to control agricultural business risks. Derivative and hedge accounting methodologies will also be explored.
4. To understand how to prepare agricultural-based financial statements and to perform in-depth financial analyses of farm-related businesses and projects.

### ACADEMIC INTEGRITY

The university's policy on Academic Integrity is available at <http://academicintegrity.rutgers.edu/academic-integrity-policy>. The principles of academic integrity require that a student:

- properly acknowledge and cite all use of the ideas, results, or words of others.
- properly acknowledge all contributors to a given piece of work.
- make sure that all work submitted as his or her own in a course or other academic activity is produced without the aid of impermissible materials or impermissible collaboration.
- obtain all data or results by ethical means and report them accurately without suppressing any results inconsistent with his or her interpretation or conclusions.
- treat all other students in an ethical manner, respecting their integrity and right to pursue their educational goals without interference. This requires that a student neither facilitate academic dishonesty by others nor obstruct their academic progress.
- uphold the canons of the ethical or professional code of the profession for which he or she is preparing.

Adherence to these principles is necessary in order to ensure that

- everyone is given proper credit for his or her ideas, words, results, and other scholarly accomplishments.
- all student work is fairly evaluated and no student has an inappropriate advantage over others.
- the academic and ethical development of all students is fostered.
- the reputation of the University for integrity in its teaching, research, and scholarship is maintained and enhanced.

Failure to uphold these principles of academic integrity threatens both the reputation of the University and the value of the degrees awarded to its students. Every member of the University community therefore bears a responsibility for ensuring that the highest standards of academic integrity are upheld.
