COURSE DESCRIPTION:
This course provides a basic understanding of concepts and practices of financial management including the
analysis of a firm’s financial position, working capital management and budgeting, costs of funds and capital
structure, and financial instruments.

LEARNING GOALS:
By the end of the students will be able to:

1. Understand and appreciate the basic financial decisions facing corporations and how these financial
decisions are managed.
2. Analyze basic information contained in financial statements and understand how it is used to make
financial decisions.
3. Perform, with the help of business calculator, various FV/PV calculations, including NPV and IRR, and
apply the results to solve business problems that inform financial decisions.
4. Measure and evaluate the role of risk involved in business problem solving and decision-making.
5. Calculate the Weighted Average Cost of Capital for a company and understand the concept of “cost of
capital.”
ASSIGNMENTS/RESPONSIBILITIES, GRADING & ASSESSMENT:

There will be 3 exams during the course and during class hours.

The project will require that students (assigned in groups of 5-6) select, research and conduct financial analyses on firms of a similar nature; e.g., Amazon vs. Alibaba; Verizon vs. AT&T; Exxon Mobil vs. Chevron, Google vs. Apple, using three common business software programs such as PowerPoint, Excel, and Word or their equivalents. Students must apply appropriate financial concepts in their analysis and communicate their findings clearly both orally and in writing. Students will have 15 minutes to present their research to the class and submit a 5-page written report plus the attachment of 1 original spreadsheet of the companies being researched. Each presentation will be followed by a 5-minute class discussion.
ACCOMODATIONS FOR STUDENTS WITH DISABILITIES
Please follow the procedures outlined at https://ods.rutgers.edu/students/registration-form. Full policies and procedures are at https://ods.rutgers.edu/

**ACADEMIC INTEGRITY**
The university's policy on Academic Integrity is available at http://academicintegrity.rutgers.edu/academic-integrity-policy. The principles of academic integrity require that a student:

- properly acknowledge and cite all use of the ideas, results, or words of others.
- properly acknowledge all contributors to a given piece of work.
- make sure that all work submitted as his or her own in a course or other academic activity is produced without the aid of impermissible materials or impermissible collaboration.
- obtain all data or results by ethical means and report them accurately without suppressing any results inconsistent with his or her interpretation or conclusions.
- treat all other students in an ethical manner, respecting their integrity and right to pursue their educational goals without interference. This requires that a student neither facilitate academic dishonesty by others nor obstruct their academic progress.
- uphold the canons of the ethical or professional code of the profession for which he or she is preparing.

Adherence to these principles is necessary in order to ensure that

- everyone is given proper credit for his or her ideas, words, results, and other scholarly accomplishments.
- all student work is fairly evaluated and no student has an inappropriate advantage over others.
- the academic and ethical development of all students is fostered.
- the reputation of the University for integrity in its teaching, research, and scholarship is maintained and enhanced.

*Department of Agricultural, Food and Resource Economics*
Failure to uphold these principles of academic integrity threatens both the reputation of the University and the value of the degrees awarded to its students. Every member of the University community therefore bears a responsibility for ensuring that the highest standards of academic integrity are upheld.
